

C-LOG: DOUBLING DOWN ON CAMBRAI

E-Valley's direct access to the A2 and A26 highways offers strategic benefits to all its tenants, but for C-LOG, its location in the Cambrai region has been especially crucial to overall business growth. C-LOG, which specialises in fashion supply chain and has had a presence in the region since 2009, needed to double its surface area quickly to support brand expansion and launch a new strategic partnership in the fashion sector.

With E-Valley situated less than six kilometres from its existing premise in Tilloy-lez-Cambrai, it was the natural choice for C-LOG's immediate growth. In addition, building permission for almost six million sq.ft. of warehouse space means that the park has plenty of capacity for future expansion as the business continues to grow.

Working in partnership with E-Valley ensures that the highest security requirements for C-LOG's logistics flows are met while also granting access to E-Valley's value-added services.

“We have particularly appreciated the support, involvement and, above all, the respect of commitments and timelines from the E-Valley teams in the implementation of this project.”

– Benoit Garçon, Director General, C-LOG
